

## Put Lexmark to work for you

**Committed to Customer Service.** One-hundred percent focused on printing solutions and services, Lexmark puts leading-edge technology to work for every customer. Our worldwide reach ensures dependable service support whenever and wherever it is needed. Lexmark provides a broad spectrum of capabilities with high performance printers, supplies, service support and parts.

**Professional Services.** You manage your business based on facts – why not your output? Gathering data regarding your distributed output devices can be a difficult, never-ending process. Lexmark's Consultants have a proven tools and methodology that efficiently collect your output data and then assists you in developing an output strategy that best meets your needs significantly improving your office productivity and substantially reducing your costs.

**Fleet Management.** Lexmark utilises world-class people, technology, and processes to ensure your output devices are being optimised and are available at the most important time – when you need them. Our offerings range from proactive break-fix solutions to consumables fulfillment which leveraging our industry leading infrastructure to manage your assets enabling you to more effectively manage your business.

In Australia Lexmark partners with Planet Ark to collect and recycle toner and ink cartridges. Visit [www.lexmark.com.au](http://www.lexmark.com.au) for more details.

## Technical Specifications

|                                    |   |
|------------------------------------|---|
| <b>Print technology</b>            | Colour Laser  |
| <b>Print speeds</b>                | Mono: 45 ppm, Colour: 40 ppm  |
| <b>Time to first page</b>          | Mono: 4.9 seconds, Colour: 8.7 seconds  |
| <b>Processor</b>                   | 1.25 GHz  |

## Lexmark C935dn

High performance workgroup A3 printing, with low cost colour when you need it

Put Lexmark to work for you.

Colour Laser Printer

## Productivity for your business

The new Lexmark C935 puts an end to the theory that colour printers should only be dedicated to colour output. Designed to support the A4 and A3 requirements of large, high volume workgroups, the Lexmark C935 can print monochrome jobs at the same printing costs as similar monochrome only printers. And, at up to 45 ppm mono and 40 ppm in full colour it can also meet the performance and productivity required from a machine supporting both your mono and colour printing requirements.

**Flexible features.** The C935 offers multiple paper input options, up to 3,140 sheets, as well as advanced finishing such as folded booklets. With the standard finisher, stapling and hole-punching documents is a breeze (for up to 3,500 sheets). Plus, the advanced finisher produces sheet folded booklets (saddle-stitched) for internal creation of brochures, catalogues and manuals.

**Horsepower to get the job done.** Combined with the speed of output, the C935 provides a 1.25 GHz processor, and 256 MB memory standard. With RAM upgradeable to over 1 GB, and a hard-drive option for complex document processing, the Lexmark C935 likes to finish first!

**Robust and ready to run.** The C935 can easily handle high volume workgroup print volumes of 10,000 pages or more with a maximum monthly duty cycle of 200,000 pages.

## Keeping your critical information safe

The Lexmark C935 includes specially designed security features to ensure your critical information remains secure. This robust system is designed for enterprise-level security, including disk wiping for hard drive enabled models, encryption, IPSec, SSL, SNMP v3, 802.1x and secure user authentication to provide security features for management, network

communications and information storage. These flexible security features ensure your sensitive documents always stay in the right hands.

## Lexmark innovations let you harness time saving technology

- With ImageQuick from Lexmark, archive management and document retrieval can become fast, seamless processes. ImageQuick allows staff to print instantly from internet and intranet sources, including direct printer access to web material, daily updates, and immediate internal access to your archived files.
- When combining the Lexmark C935 with Lexmark's Document Distributor Software (LDSS) users can automate manual processes and create and manage online forms to integrate paper and digital document workflow to save you valuable time.
- Standalone convenience includes a USB direct interface on the front panel of the Lexmark C935 which lets you walk up, plug in and start printing using a standard USB Key/Thumb Drive. The USB interface allows mobile users to print PDF, JPG & TIFF files directly to the printer without connecting to the network, or loading the viewing software, or needing a print driver. award-winning solutions. We've used that knowledge and experience to deliver the extremely robust C935.

- Fast! 45 ppm** Save time by printing up to 45 ppm black and up to 40 ppm colour
- Professional** 2400 dpi Quality produces sharp, vivid, high quality results
- Affordable** Low cost colour and mono printing at the same TCO as a mono only printer
- Lexmark Colour Care Technology** Gives you the tools to analyse and control your colour printing costs
- Secure** Personal ID number and a range of other secure features ensure document confidentiality
- Versatile** Support for A3 printing standard. Upgrade to meet the specific needs of your business, including booklet finishing

## Because quality really matters

**Print Quality choices.** The new C935 print driver allows users to choose from Photo, mixed photo and text, or text-only modes. This gives users the ability to optimise their output based on its original content.

**Flexible media throughout.** The Lexmark C935 is the one-stop, right choice for both your general office and specialised print needs. Print on a wide variety of media ranging from 60 gsm up to card stock, envelopes and specialty labels.

**Make every document stand out.** The Lexmark C935 will provide you with the power to communicate your key messages more effectively in colour and represent your business in its best light. With object-dependent colour correction (which simply means the Lexmark C935 is smart enough to handle mixed text, images and graphics at the page level and apply the most appropriate colour science) your output quality is optimised page after page, every time. Plus, flexible printer controls in the printer driver ensure high colour consistency and extensive colour matching capabilities for the easiest through to the most complex of jobs.

## Easy to use so you can get on with the job

A sleek new design and a long list of ease-of-use features give your business the tools you need for uncomplicated colour.

- Large display panel with graphics provides "Show Me" messaging to make it easy to interact with the printer
- One-touch job cancel button stops printing jobs in progress instantly
- User-friendly 10-digit numeric key pad for easy operator panel entries
- Easy-load paper tray can't be over-filled
- Front-loading, extra high-yield cartridges mean less user intervention and greater reliability

## Keeping your colour costs under control

The benefits of colour are widely recognised, however until now, they have come at price. The Lexmark C935 is designed to put you in total control of colour costs. In addition to high-yield cartridges and a low cost per page, it comes equipped with Lexmark's unique ColorCare technology, a complete range of colour-cost-control tools, including:

- Black and White Lock Mode - allows you to select periods during the day when the printer can print colour
- Proof Then Print - prevents the wastage of multiple colour prints
- Toner Saver - offers 3 levels of toner use and saving up to 50% on colour printing costs
- Colour Saver - by selecting the Colour Saver mode in the printer driver, users can reduce the toner used to print images and graphics while maintaining the integrity of the text
- Coverage Estimator - allows users to estimate the costs of printing any colour page
- Colour Print Permissions - allows IT administrators to easily configure the printer to allow only certain network user ID's to print in colour.

## Versatility and flexibility to get the job done faster

Don't sacrifice the productivity just because you need the colour. In addition to providing the benefits of colour when you need it, the Lexmark C935 is designed to manage your existing mono printing requirements as well:

- High volume paper handling to support large workgroups and high volume printing, with maximum input of up to 3,140 sheets and output of up to 1,750 sheets
- Up to 1.5 million page life, with a broad range of media support, even through the standard paper trays
- Prints on just about any size document from 70 x 127 mm to A3, Tabloid and right up to 297 x 1,219 mm banner printing
- Choice of optional drawers, high capacity input, booklet finishing or 4 hole-punch finisher with stapler
